

MicroWash System

With the unique MicroWash handle you can clean the floors faster and more ergonomic. You just fill the handle with water or chemical solution and do not need any buckets.

It is simple to remove the cap and fill the handle with liquid.

Push the cap and liquid is being released.

The liquid is dosed in front of the mop.

MicroWash handle with mopholder in aluminium with velcro attachment and MicroSweep Duotex™ mop for dry, damp and wet cleaning. Available in different sizes.
